# Notes to Financial Statement

Build America Mutual Assurance Company (“Build America” or the “Company”) is a New York domiciled mutual financial guaranty insurance company. The Company was capitalized on July 17, 2012 and received its license to write financial guaranty insurance from the New York State Department of Financial Services (the “Department”) and commenced operations on July 20, 2012. Build America is also licensed in the District of Columbia and the remaining 49 states. Build America’s financial strength and counterparty credit ratings of ‘AA/Stable Outlook’, from Standard & Poor’s Ratings Services, were reaffirmed on June 26, 2017. Build America is not licensed to write financial guaranty insurance in Puerto Rico or any other territory or possession of the United States, and it has no exposure to debt issued in Puerto Rico or any other territory or possession of the United States.

The first mutual bond insurance company, Build America is owned by and operated for the benefit of the cities, states and other municipal agencies—the municipal issuers—that use the Company’s ‘AA/Stable Outlook’ rated financial guaranty to lower their cost of funding in the U.S. municipal market. Build America’s unique corporate structure distinguishes it from traditional financial guaranty insurers in many important ways:

- Build America’s charter, underwriting guidelines and credit policies permit the Company to insure only long-term, essential public purpose municipal bonds in core sectors for municipalities or entities that otherwise qualify for tax exemption under Section 115 of the Internal Revenue Code;
- Build America’s mutual model permits capital growth to track insured portfolio growth, eliminating the need to “go public” to raise capital, to drive earnings growth to satisfy equity markets, or to engage in mission creep by taking on risks outside of the core municipal market; and
- In addition to its own strong capital base, Build America has the benefit of collateralized first loss reinsurance protection for losses up to the first 15% of par outstanding on each policy written.

Build America collects a payment for every policy that it issues, comprising i.) a risk premium and ii.) a Member Surplus Contribution (“MSC”) that is recognized as an addition to other than special surplus funds when collected. An issuer’s MSC is creditable to the payment due when Build America guarantees debt that refunds a debt issue insured by the Company. Issuers whose debt is insured by Build America become members of the Company for as long as they have debt outstanding insured by Build America, and as members have the right to vote and to receive dividends, if declared, and other benefits of mutual membership. The Company’s policies are issued without contingent mutual liability for assessment.

On July 17, 2012, the Company issued, for cash, the Series 2012-A Surplus Notes and Series 2012-B Surplus Notes (collectively, the “Series 2012 Surplus Notes”) to HG Holdings, Ltd. (“HG Holdings”), a Bermuda holding company, and its wholly owned subsidiary HG Re, Ltd. (“HG Re”) in the amount of \$203,000,000 and \$300,000,000, respectively. During 2017, in order to further support BAM’s long-term capital position and business prospects, HG Holdings contributed the \$203,000,000 Series 2012-A Surplus Notes to HG Re. On August 14, 2017, HG Re surrendered the Series 2012-A and Series 2012-B Surplus Notes and the Company issued surplus notes in the amount of \$503,000,000 (the “Series 2017 Surplus Notes”) to HG Re in order to consolidate the Series 2012 Surplus Notes into a single series.

The Company’s reinsurance protection is provided by HG Re via a first-loss reinsurance treaty (the “Reinsurance Agreement”), whereby HG Re assumes all directly insured losses in an amount up to 15% of the par outstanding for each insurance policy. HG Re’s obligations under the Reinsurance Agreement are secured by, and limited to the value of, high quality assets held in trusts, which are pledged for the benefit of Build America.

Both HG Holdings and HG Re are wholly owned subsidiaries of HG Global, Ltd. (“HG Global”), a Bermuda corporation. HG Global’s controlling parent is White Mountain Insurance Group, Ltd., a Bermuda-domiciled financial services holding company (“White Mountains”), which owns 88% of HG Global’s common equity and 97% of its preferred equity. Two of the Company’s directors, Mr. Cochran and Mr. McCarthy, along with 11 of the Company’s current and former officers and employees, own individually or through family trusts the remaining common and preferred equity interests in HG Global.

## 1. Summary of Significant Accounting Practices

### A. Accounting Practices

The accompanying statutory-basis financial statements have been prepared on the basis of accounting practices prescribed or permitted by the State of New York.

The Department recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company for determining its solvency under New York State Insurance Law (“NYSIL”). The National Association of Insurance Commissioners (“NAIC”) Accounting Practices and Procedures manual (“NAIC SAP”) has been adopted as a component of prescribed practices by the Department.

The Department has the right to permit other specific practices that deviate from prescribed practices. During 2012, the Company received permission from the Department to defer the recognition of the deferred tax liabilities attributable to MSC received until such time as the MSC are included in the Company’s taxable income, to the extent that the total gross deferred tax liabilities exceed the total gross admitted deferred tax assets. The Department’s permission to utilize this permitted practice expires on December 31, 2018. The permitted practice had no effect on net income for the three months ended March 31, 2018 or March 31, 2017 or the year ended December 31, 2017, and had no effect on statutory surplus as of March 31, 2018 or December 31, 2017.

# Notes to Financial Statement

- (2) No significant changes from the 2017 Notes to the Financial Statements.
- (3) No significant changes from the 2017 Notes to the Financial Statements.
- (4) No significant changes from the 2017 Notes to the Financial Statements.
- (5) No significant changes from the 2017 Notes to the Financial Statements.
- (6) Loan-backed securities with an NAIC designation of 1 or 2 are reported at amortized cost.

Changes in estimated cash flows, including the effect of prepayment assumptions, on loan-backed securities are reviewed periodically. Prepayment assumptions are applied consistently to securities backed by similar collateral. Loan-backed securities are revalued using the estimated cash flows, including new prepayment assumptions using the retrospective adjustment method. If there is an increase in expected cash flows, the Company will recalculate the amount of accretible yield. If there is a decrease in expected cash flows or if the fair value of the loan-backed security has declined below its amortized cost basis, the Company determines whether an other-than-temporary-impairment ("OTTI") has occurred.

For loan-backed securities for which the fair value has declined below its amortized cost basis and the Company either: i.) has the intent to sell the security, or ii.) does not have the intent or ability to hold security for a period of time sufficient to recover the amortized cost basis, an OTTI shall have occurred. The amount of the OTTI recognized in earnings as a realized loss will equal the entire difference between security's amortized cost basis and its fair value at the balance sheet date.

When an OTTI has occurred because the Company does not expect to recover the entire amortized cost basis of the security, even if the Company has no intent to sell and the Company has the intent and ability to hold, the amount of the OTTI recognized in earnings as a realized loss shall be equal to the difference between the security's amortized cost basis and the present value of cash flows expected to be collected.

### 20. Fair Value Measurements

- A. The fair values of the Company's financial instruments are determined primarily through the use of observable inputs. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from external independent sources. Unobservable inputs reflect management's assumptions about what market participants' assumptions would be in pricing the asset or liability based on the best information available. The Company classifies financial assets in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement. This classification requires judgment in assessing the market and pricing methodologies for a particular security. The fair value hierarchy is comprised of the following three levels:

Level 1: Valuations are based on unadjusted quoted prices in active markets for identical financial assets or liabilities;

Level 2: Valuations of financial assets and liabilities are based on prices obtained from independent index providers, pricing vendors or broker-dealers using observable inputs; and

Level 3: Valuations are based on unobservable inputs for assets and liabilities where there is little or no market activity. Management's assumptions and/or internal valuation pricing models are used to determine the fair value of financial assets or liabilities.

- (1) The Company did not record any of its assets or liabilities at fair value as of March 31, 2018 or December 31, 2017.
- (2) During the three months ended March 31, 2018 and the year ended December 31, 2017, the Company did not transfer any assets or liabilities into or out of Level 3. The estimated fair value of the liability for net financial guaranty insurance contracts as of December 31, 2017 and December 31, 2016 was \$129,348,609 and \$126,252,022, respectively.
- (3) Transfers of assets and liabilities into or out of Level 3 are reflected at their fair values as of the end of each reporting period, consistent with the date of determination of fair value.
- (4) The following inputs, methods and assumptions were used to determine the fair value of each class of financial instrument for which it is practicable to estimate that value:

#### Bonds

The estimated fair values generally represent prices received from third party pricing services or alternative pricing sources. The pricing services prepare estimates of fair value measurements using their pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities and matrix pricing. The observable inputs used in the valuation of these securities may include the spread above the risk-free yield curve, reported trades, broker-dealer quotes, bids, prepayment speeds, delinquencies, loss severity and default rates. In cases where specific market quotes are unavailable, interpreting market data and estimating market values require considerable judgment by management. Accordingly, the estimates presented are not necessarily indicative of the amount the Company could realize in the market. In these cases, the fair value measurements are primarily classified as Level 2.

#### Cash and Short-Term Investments

The fair value of cash and short-term investments approximates its amortized cost. The fair value measurements were classified as Level 1.

#### Investment Income Due and Accrued

The fair value of investment income due and accrued approximates carrying value, and the fair value measurements were classified as Level 1.

#### Net Financial Guaranty Insurance Contracts

The fair value of net financial guaranty insurance contracts represents the Company's estimate of the cost to Build America to completely transfer its insurance obligations to another financial guarantor under current market conditions. Theoretically, this amount should be the same amount that another financial guarantor would hypothetically charge in the market place to provide the same protection as of the balance sheet date. The cost to transfer these insurance obligations is based on pricing assumptions observed in the financial guaranty market and includes adjustments to the carrying value of unearned premium reserves, member surplus contributions and ceding commissions. The significant inputs are not observable. The Company accordingly classified this fair value measurement as Level 3.

# Notes to Financial Statement

(5) The Company did not hold any derivative assets or liabilities as of March 31, 2018 or December 31, 2017.

B. The fair values of the Company's financial instruments are reflected in the table in footnote 20(C).

C. The admitted assets, fair values and related level classification within the fair value hierarchy of the Company's financial instruments was as follows:

- (3) The Company did not have any claim liabilities for financial guaranty insurance contracts in force as of March 31, 2018.
- (4) Insured obligations are monitored periodically with the objective of identifying emerging trends, updating the external and internal ratings and surveillance categories and avoiding or minimizing losses. The Company classifies each credit in its insured portfolio using the following surveillance categories:

I – Performing – Standard Oversight

Credit is performing well. No losses are expected.

II – Performing – Enhanced Oversight

Credit experiencing financial, legal, or administrative problems, causing overall credit quality deterioration or a breach of one or more covenants or triggers. Issuers in this category are, to the extent possible, taking all necessary remedial actions. For some issuers, factors outside of their control are the cause, at least in part, of the deterioration in their credit profile. Issuers in this category are more closely monitored by Surveillance. Despite the current credit difficulties, BAM does not expect any interruption of debt service payments and no losses are expected.

III – Watchlist – Deteriorated

Credit experiencing financial, legal, or administrative problems, causing overall credit quality deterioration or a breach of one or more covenants or triggers, which if not corrected could lead to a loss on the policy. Issuers in this category are not taking conclusive remedial action or are unable to do so due to external factors, requiring Surveillance to employ enhanced surveillance and loss mitigation procedures. This may include the development of a remediation plan in consultation with internal and/or external attorneys, and/or outside consultants. The objectives of any remediation plan would be to address the problems the issuer is facing and any external factors impacting the credit, as well as ensuring that creditor's rights are enforced and curing any breaches that may have occurred with respect to any credit triggers or covenants. BAM may work with other insurers, bondholders, and/or interested parties on remediation efforts, as applicable. Probability of a loss is remote.

IV – Watchlist – Distressed

A loss is expected or losses have been paid and have not been recovered or are not recoverable. Surveillance is employing enhanced surveillance and loss mitigation procedures, and may include a remediation plan developed in consultation internal and/or external attorneys, and/or outside consultants. Probability of a loss is elevated.

All of the Company's credits are deemed Performing and have been assigned to either category "I – Performing – Standard Oversight" or "II – Performing – Enhanced Oversight."

- B. The Company has no gross claim liabilities or potential recoveries as of March 31, 2018 or December 31, 2017.
